

Nature Forage

Chimpanzees spend a big part of their day foraging, or searching for snacks in their habitats. Forage like a chimpanzee in your own yard, but for collecting and not for eating! Collect forage like a chimpanzee or one of your local wildlife. Glue or tape your findings on the sheet and label the items with your pencil. Name the type of animal that would snack on this forage.

Suggested Materials: A basket or bucket, a notepad, glue or tape, a writing tool
