

DIY Stethoscope

Veterinarians use all kinds of tools to care for animals. A stethoscope is an instrument used for listening to different sounds of the body like the heart. Chimp Haven's veterinarian uses a stethoscope for each chimpanzee physical exam! Create your own by following these steps!

Suggested Materials

- Pipe cleaners or a headband
- Glue – hot glue works best!
- Construction paper or felt
- Ribbon

Directions

Step 1

Gather your materials!

Step 2

Cut two small circles out of paper or felt – the circles should be the same size.

Step 3

Would you like to put a shape on your stethoscope? If so, cut that out too. We chose a heart!

Step 4

Sandwich one end of the ribbon between the two circles and glue them on.

Step 5

If you are using pipe cleaners shape one into a big “u” shape.

Step 6

Wrap the other end of the ribbon around the center of your headband or pipe cleaner.

All done! You created a stethoscope.
