# The Chimp Life– Chimp ID Quiz

Learn what makes some of the chimpanzees unique both physically and in their personalities. Take a quiz to see if you can match them up.

**Austin** is a sweet guy who often seems to be very deep in thought. He's laid-back and relaxed, and enjoys spending a good sunny afternoon lounging around on the structure in his yard. He reminds staff of a quintessential surfer, very go-with-the-flow and mellow.

**Flora** was named "Chimp You'd Most like to Have as a Mom" and it's no mystery why: She's a wonderful, nurturing mother and group mate. She's very in-tune with her daughter, Valentina Rose, and never likes to be too far away from her. She's attentive, smart, and a great teacher during enrichment, but she's also quick to discipline when Rosie gets out of line!

**Carlee** brings the fun wherever she goes. Her growing independence has her climbing up high in the trees and getting into new adventures every day. She has plenty of adolescent cousins to play with, but she still loves to spend lots of time with mom, Passion, and her favorite auntie, Sara Soda.

**Jeff Lebowski** is known around the sanctuary for his handsome good looks. Since arriving at Chimp Haven in 2014, he's charmed staff and chimps alike with his funny, laid-back personality.

**Hugo** is a boisterous male. Despite being younger than the more established males, Hugo's confidence and poise have helped him reach alpha status. Sometimes he likes to cause a ruckus, but his sheepish grin always gives away his playful intentions.

**Ladybird** retired to Chimp Haven in 2011 and is well-known for her sweet face and compassionate personality. A goofy smile from Ladybird could brighten anyone's day! She and the other "golden oldies" in her group can often be found patrolling their habitat or exploring the forest.

**Onyx** likes to act rough-and-tumble, but she's also a total mama's girl. She loves to play out in the rain (which makes her hair curl, so cute!). Her brow ridge makes her look mischievous, but really she's just a funny little sweetheart.

**Valentina Rose** brings a fun, playful personality to her group. She loves a good game of chase with Mason or Jimmy, and she's a great tree climber. She usually grabs her morning produce and takes it straight up into the trees to eat. As she grows, her mom (Flora) still remains close by to keep a watchful eye.

**Hope** is the socialite of her group – everyone wants to be seen with her. The first time she was introduced to her new pals, it was clear she was going to be Miss Popularity, making friends quickly and putting the whole crew at ease. She's also a bit of a ham and loves fishing for attention from the care staff. So, what do you get the girl who loves the chimp life? In this case, something to carry in her hip pocket. She's known at the sanctuary for always carrying the latest accessories.

**Jacob** is an active member of a large social group. Though he is old and arthritic, he still climbs to the top of play structures for grooming sessions with his groupmates and panoramic views of the sanctuary. He also makes excellent nests. Jacob is easygoing and very loyal to his friends at Chimp Haven. He's a good caregiver, always close by when buddies are under the weather or in a gloomy mood. Jacob loves food and enrichment of all kinds.
