

Enrichment – Discussion Questions

(Answers)

1. What is browse and why is it good for the chimpanzees?

- Browse is sticks and leaves from plants
- Browse offers protein and fiber for the chimps
- Chimps can use the browse for tools
- It's a new stimuli and offers a change in their environment

2. How do you categorize chimpanzee forage enrichment?

- Sensory
- Food
- Environmental

3. How does the Behavior Technician in the video determine if what she included in the forage this time works and will be included in future forage mixtures?

- She observes how the chimps react to it
- She notes what they like and don't like based on observation

4. Is there something that you like that could compare to chimpanzee forage? An activity, a type of food, something that challenges you the way that forage challenges the chimpanzees?

- Examples may include trail mix, puzzles, picking wild berries, etc.
- Encourage creativity!
